

BrainyArcade

CrossRoads Institute's programs are dynamic and based upon our extensive NeuroGeniSys report of findings. Each program is then designed specifically for the client.

This program is geared to ages 6 to 16 years. It is an intense 12 to 14 week cognitive enhancement program that focuses on learning, IQ development, social/behavior, maturity, and training the brain to reach its full potential.

This program emphasizes overcoming:

-

ADD/HD

-

Impulsivity

-

Focus

-

Attention

-

Dyslexia

-

Reading Comprehension

-

Developmental Delays

-

Math

-

Learning Challenges

-

Auditory Processing

-

Memory/Retrieval

-

Academics

-

Behavior

-

Social Maturity

The programs are tailor-made for each client and use the latest EEG brain based technology to retrain and develop your child's brain and encourage your child to *reach their full potential*.
